“When we make it
in America, we create
jobs in Maryland.”

CONGRESSMAN
STENY HOYER

Congressman **Steny Hoyer's** “**Make It In America**” Jobs Plan

Congressman Hoyer has worked to help create and save nearly 23,000 jobs in Maryland's 5th District. But Steny knows there's more work to do—his “Make It In America” plan will help create even more jobs in Maryland.

Fighting for the “Make It In America” Jobs Plan

Steny has taken the lead on the “Make It In America” plan to create jobs by helping revive American manufacturing and giving families and businesses the tools they need to succeed through access to education, supporting innovation, and building a strong infrastructure. The plan includes investments in Maryland's small businesses, job training and stopping jobs from going overseas.

Promoting Job Training and Small Businesses

As part of the “Make It In America” plan, Steny helped pass the Small Business Jobs Act. The law cuts taxes for businesses that create jobs and provides loans to small businesses wanting to expand, all without adding a dime to the federal deficit. Steny also fought for the law that provides job training for veterans to work in emerging industries, including clean energy.

Stopping Jobs from Going Overseas

When more products are made in America, more families will be able to make it in America. That's why Steny helped pass a law as part of the “Make It In America” plan that helps prevent the outsourcing of jobs by closing tax loopholes that encourage American companies to ship jobs overseas. The plan also fights for a fair playing field so American businesses and workers can compete globally.
